

1 BILL NO. S-81-02- 02

2 SPECIAL ORDINANCE NO. S- 41-81

3
4 AN ORDINANCE approving Civil City Pur-
5 chase Order No. A-000556 with Allen
6 County Ford Motors, Inc. for one vehicle
7 for the Street Department.

8 BE IT ORDAINED BY THE COMMON COUNCIL OF THE CITY OF
9 FORT WAYNE, INDIANA:

10 SECTION 1. That Civil City Purchase Order No. A-000556
11 dated January 20, 1981, between the City of Fort Wayne, by
12 and through the City Purchasing Director and the Board of
13 Public Works and Allen County Ford Motors, Inc., for the
14 purchase of one dump truck with a "V" spreader and snow plow
15 to be used in the Street Department at a cost of \$46,615.84,
16 all as more particularly set forth in said Purchase Order,
17 which is on file in the Office of the Department of Purchasing
18 and is by reference incorporated herein and made a part hereof
19 be and the same is in all things ratified, confirmed and ap-
20 proved.

21 SECTION 2. That this Ordinance shall be in full force
22 and effect from and after its passage and approval by the
23 Mayor.

24 Virgil A. Schmidt
25 (COUNCILMAN)

26 APPROVED AS TO FORM AND
27 LEGALITY FEBRUARY 5, 1981.

28 J. E. Hoffman
29 JOHN E. HOFFMAN, CITY ATTORNEY
30
31
32

Memorandum

To Board of Works

Date 1/20/81

From Aaron M. Gluck

Subject Bid Reference #966-G

COPIES TO:

Attached are copies of Bids received for One (1) Dump Truck with "V" Spreader and Snow Plow for the Street Department. Purchase Order Number A-000556 has been assigned to Allen County Motors.

46,615.⁸⁴

Of the Bids received, Allen County Motors included all items specified and resulted in submitting the lowest and best Bid.

Due to the current work load and weather conditions, we are asking that a "Prior Approval" be given so as to order the above equipment.

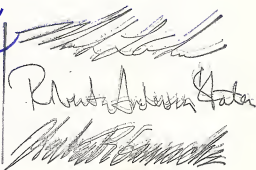

Please include the attached supporting information when this ordinance is submitted to City council for Prior Approval. Also, please insure that no confirming Purchase Order Number is given to Allen County Motors until Purchasing receives written confirmation of Council Approval.

Aaron M. Gluck - Director of Purchases

AFFIRMATIVE ACTION PROGRAM

Company President is our Equal Employment Opportunity Officer and will coordinate and advise staff members in non discrimination recruiting and promotion.

Further, to assure non discrimination in recruiting, all employment openings will be posted and advertised in newspapers with a circulation to reach minority applicants and encourage current employees to refer minority applicants.

To assure for advancement of all employees regardless of age, sex, national origin, color or religion. All job openings will be posted and applicants and employees may apply.

Any training schools or training programs offered by our suppliers in each respective area will be offered equally to all employees in their specific areas.

Assure nondiscriminatory pay, other compensation, and working conditions by periodically taking appropriate steps, such as;

- a. Examining rates of pay and fringe benefits for present employees with equivalent duties, and adjusting any inequities found;
- b. Not reducing the compensation of existing employees with equivalent duties, and adjusting any inequities found;
- c. Advising all qualified employees whenever there is an opportunity to perform overtime work.

In regard to demotion, layoff, or termination we require advance clearance of such actions through our company's Equal Employment Opportunity Officer.

One (1) New 1980 Single Axle Heavy Duty Dump Truck equipped complete with Front Mounted Snow Plow, Hydraulic "V" Box Material Spreader, and a Crankshaft P.T.O. Hydraulic System according to the Fort Wayne City Street Department Specifications. Any alternate maybe submitted for consideration.

Crankshaft P.T.O. Hydraulic System

The Central Hydraulic System Under These Specifications Shall Have The Following Minimum Specifications.

The hydraulic pump shall be capable of delivering a minimum of 26 G.P.M. at 2000 P.S.I. at normal truck engine speed. It shall be connected to the engine crankshaft pulley by a double universal splined shaft, or any other method approved by the truck manufacturer. A universal joint flange, a kit necessary for the connecting of the pump to the crankshaft pulley shall be furnished by the truck manufacturer. The truck manufacturer shall also furnish as part of the crankshaft P.T.O. Kit, a heavy duty front bumper extended a minimum of 9" forward of the radiator grill and a hood of such design so as to permit the installation of a front mounted snow plow and also the normal servicing of the truck engine.

A four section hydraulic bank valve having a minimum capacity of 29 G.P.M. at 2000 P.S.I. shall be installed outside the truck cab in such a manner so as to facilitate its servicing in a convenient manner. Control levers connecting to the bank valve shall be so installed in the cab at the drivers right side within a convenient reach of the driver or companion operator. The control levers shall be clearly marked so as to their function and each lever shall be easily disconnected at the bank so as to make each lever inoperative from the cab when it is so desired. The control levers shall be so adjusted so as to operate the front plow, underbody scraper and dump body. Provisions shall be made at the bank valve for power beyond to facilitate the installation of a spreader valve or any other hydraulic attachment of a similar nature. Each valve to be individually adjustable for pressure relief. A hydraulic 30 gallon oil reservoir tank of an approved type and of sufficient capacity shall be so installed to permit maximum cooling and convenient servicing. A replaceable 50 G.P.M. cartridge type oil filter with a 33 micron element shall be installed on the return line.

The hydraulic suction hose from the reservoir to the pump shall be a minimum 1 1/4" dia. with a 100R4 S.A.E. rating or better. The hydraulic pressure hose from pump to the valve bank shall be a minimum of 3/4" dia. with a 100P2 rating or better. The return hose to the reservoir and through the filter shall be a minimum 1" dia. with 250 P.S.I. rating or better. All lines shall be properly supported at all points and protected from chafing.

Any parts or components which are required for a complete operable hydraulic system shall be included.

All hoses, fittings, and component parts for connecting any hydraulic attachment such as the plow, scraper, dump box, etc., are to be supplied by the manufacturer of the particular attachment.

SPECIFICATIONS QUESTIONNAIRE

BIDDERS PROPOSAL MUST BE COMPLETED

BY THE BIDDER

The following meets your specifications entirely.

General: Highway Model E-2020, 10' Spreader consisting of a steel "V" box hopper body; horizontal spinner mechanism; separate hydraulic motor drives for spinner and body conveyor; a rigid steel framework to support the body & spinner mechanism; necessary hardware for mounting in 10'x7' box

1. Body: 10 ga. higrade steel w/double crimped top edge interlined w/formed channel. Length - 10'. Width - 80" or more. Height - 50" or less. Slope not less than 45°. Hopper - 5.6 cu. yd. cap. water lever full. Body & conveyor electrically welded into a common solid unit. Formed supporting jacks of 10 ga. steel welded on 2' centers extending from bottom support channels to top of the sloping sides. Bottom support channels - 3" structural steel channel providing rigid base for the longitudinals & supporting jacks. A 6" junior I beam shall extend from front to rear at the top center of hopper body & shall be welded in place thus providing a brace and hinge point for top screens. The rear of the hopper shall have an adjustable gate with a screw type jack allowing a positive gate setting.

2. Conveyor: Shall be of 10 gauge higrade steel formed channel with top edge formed down over conveyor chain providing a chain shield to prevent material from entering chain links. Conveyor bottom shall be a replaceable 3/16" steel plate.
3. Chain: Shall be of formed alloy steel with heat treated hardened steel pins. The chain shall have a 4" adjustment range. Drive assembly shall be minimum 6 tooth, self-cleaning drop forged sprockets keyed to 2" diameter drive shaft. It shall be driven by a spin gear box with minimum 6:1 reduction ratio with machine cut hears in a shielded housing and running in oil. The idler shaft shall be of 1½" diameter with minimum 6 tooth self-cleaning sprocket opposite the welded sprocket.
4. Spinner: Shall be 18" diameter of larger disc of 10 gauge steel with 6 formed heat treated, replaceable flights. The disc is mounted on an easily replaceable hub connected directly to the gear type hydraulic drive motor. The drive motor shall be supported by formed heavy duty channel. Above the disc there shall be adjustable baffles to control direction of spread. The spinner hopper shall be fully enclosed and bolted to body sills. Drive shaft shall be telescopic providing height adjustments. Housing to be vertically adjustable also. The entire assembly shall be removable for easy storage and service.
5. Hydraulic System: The system shall have a variable speed spinner control to operate independently of conveyor speed. This control will be mounted outside of the spinner assembly to allow it to be pre-set and untouched by the operator. The oil not used by the spinner will go to the conveyor motor to allow 100% of oil pumped to be used. Conveyor speed will be direct function of hydraulic pump output. Manufacturer will supply an electric on-off switch in cab. Relief valves will be present.

THIS COPY FOR PERSON ADDRESSED

Two Perfection Jobhandlers for standard and medium-duty bodies. They provide excellent load stability under rated conditions shown on back. Check these features:

- ① Perfection's special double-shear weld-on type hinges, made to weld directly to the I-beam longitudinals.
- ② Wider, stronger all-welded double lifting arms designed to shoulder the load.
- ③ The upper hoist brackets are bolt-on type, tied directly into the body's I-beam longitudinals, to distribute stress throughout the body floor.
- ④ An all-steel welded hoist sub-frame, ideal for absorbing thrust and shock, is full length and width, for a firm base on the chassis.
- ⑤ Perfection's superior quality seamless cylinder, precision-honed, encasing a heavy duty 3-ring piston, for smooth, dependable action.
- ⑥ The crosshead, point of greatest stress, has a full-width bearing, extra sturdy malleable iron coting.
- ⑦ I-beam section malleable iron casting lift links, operating on securely anchored steel shafts.
- ⑧ Bolted, low-pressure cylinder head design, easy to remove for service if necessary.

Specifications For Hydraulic "V" Box Material Spreader

C.C. Harman
Charles Tuttle
419 738 8108

General - The spreader shall consist of:

A steel "V" box hopper body; horizontal spinner mechanism; separate hydraulic motor drives for spinner and body conveyor; a rigid steel framework to support the body and spinner mechanism; necessary hardware recommended by manufacturer for mounting in a 10' x 7' dump body.

The Spreader Shall Meet Or Surpass The Following Specifications:

1. Body: 10 Ga. hygrade steel with double crimped top edge interlined with formed channel. Body length shall be 10'. Body width shall be 80" or more. Body height shall be 50" or less. Body slope shall be not less than 45°. Hopper shall have 5.6 Cu. Yd. capacity water level full. Body and conveyor are to be electrically welded into a common solid unit. There shall be 1 3/4" diameter formed supporting jacks of 10 Ga. steel welded on 2' centers extending from the bottom support channels to the top of the sloping sides. The bottom support channels shall be 3" structural steel channel providing a rigid base for the longitudinals and supporting jacks. A 6" junior I beam shall extend from front to rear at the top center of hopper body and shall be welded in place thus providing a brace and hinge point for top screens. The rear of the hopper shall have an adjustable gate with a screw type jack allowing a positive gate setting.
- 1 3/4" diameter*
13" roller
50 to 1

2. Conveyor: Shall be of 10 Ga. higrade steel formed channel with top edge formed down over conveyor chain providing a chain shield to prevent material from entering chain links. Conveyor bottom shall be a replaceable 3/16" steel plate.

3. Chain: Shall be of formed alloy steel with heat treated hardened steel pins. The chain shall have a 4" adjustment range. Drive assembly shall be minimum 6 tooth, selfcleaning drop forged sprockets keyed to 2" diameter drive shaft. It shall be driven by a spin gear box with minimum 6:1 reduction ratio with machine cut gears in a shielded housing and running in oil. The idler shaft shall be 1 1/2" diameter with minimum 6 tooth self cleaning sproket opposite the welded sprocket.
- 10'*
3878 00
CPH 2H-10'
6.3 1/2"

4. Spinner: Shall be 18" diameter or larger disc of 10 Ga. steel with 6 formed heat treated, replaceable flights. The disc is mounted on an easily replaceable hub connected directly to the gear type hydraulic drive motor. The drive motor shall be supported by formed heavy duty channel. Above the disc there shall be adjustable baffles to control direction of spread. The spinner hopper shall be fully enclosed and bolted to body sills. Drive shaft shall be telescopic providing serveral height adjustments. Housing to be vertically adjustable also. The entire subassembly shall be removable for easy storage and service.
- 4161 00*
Paul Tuttle
Tank

5. Hydraulic System: The system shall be a variable speed spinner control to operate independly of conveyor speed. This control will be mounted outside of the spinner assembly to allow it to be pre-set and untouched by the operator. The oil not used by the spinner will go to the conveyor motor to allow 100% of oil pumped to be used.
- 30 to 45 Days*

Conveyor speed will be a direct function of hydraulic pump output.

Manufacturer must supply an electric on-off switch in the cab. Relief valves must be present to insure component safety from extremely high pressures. Central hydraulics will be furnished by city and spreader shall have necessary hoses, valving, and fittings to hook up to central hydraulic system.

6. Drive: Separate hydraulic "orbital" type motors for high starting and running torque at low speed shall power the spinner and conveyor gear box.
7. Accessories: Screens over hopper slightly elevated at the center allowing large objects to roll off the box. Unit to be equipped with "belt over chain" conveyor to protect conveyor and chain. An automatic chain oiler, if available, is also asked for. 4 section baffle system to control width and direction of speed. Inverted "V" adjustable to reduce load pressure on conveyor.

Dump Body

The Dump Body furnished under these Specifications shall have the following minimum Specifications.

1. Length - 10 ft.
2. Width - 7 ft.
3. Capacity - 5 Cu. Yd. with 6 Cu. Yd. ends
4. Hoist - 14 Ton
5. Shield - 1/2 Cab
6. Color - Omaha orange
7. Clearance lights, reflectors and flaps to be included
